

Syllabus

Course Information

Course	CPS 200 - Programming I
Semester	Spring 2026
Instructor	Kyu Hur
Instructor Contact Information	khur@japan.lakeland.edu
Class Schedule	Mon, Wed 18:15-19:45
Class Location	510 / MC
Office Hours	Wed, 19:45-20:15

Expectations for Being on Campus:

All Lakeland University Japan classes are IN-PERSON classes. There is no-online attendance.

Required Textbook(s)

- Think Python – 3rd edition
 - <https://allendowney.github.io/ThinkPython/index.html>
- Open Data Structures
 - <https://opendatastructures.org/ods-python.pdf>

Required Supplemental Material(s)

- Thonny (Python IDE)
 - <https://thonny.org/>
- Google Colaboratory (requires a Google account)
 - <https://colab.research.google.com/>

Course Description and Prerequisite(s)

An introduction to computer programming. Emphasis on problem solving techniques, structured programming, top-down program design, control structures, and functions.

Pre-requisite: MAT 140 - Advanced Algebra.

Learning Outcomes

- Develop the concepts of computer systems and computer programming.
- Demonstrate a basic understanding of binary numbers and their role in computer programming.
- Write clear accurate programs in a high-level language.
- Draw flowcharts of programs.
- Write program codes to get input data and send output data.
- Develop the concept of functions and construct functions.
- Write programs that use selection, loops and functions.
- Solve simple problems using fundamental programming techniques and basic problem-solving skills.
- ___ Develop programs to implement real-life applications.

Course Requirements

Students are expected to bring a charged, working computer to class every day.

INSTITUTIONAL POLICIES:

Counseling

LUJ employs professional counselors, who are available online several times each week to assist students experiencing stress, emotional problems, family issues, school-related pressure and other stress-related issues. They are also available at other times in case of emergency.

Please contact Student Affairs (studentaffairs@japan.lakeland.edu) to make an appointment with a counselor, or contact them directly if you have had previous meetings. Students should try to make an appointment in advance as the counselors' time is limited. There is no stigma to visiting a counselor to seek help, and they maintain strict confidentiality on what they are told.

Attendance Policy

While there is no grade given for attendance, every session will have some form of assignment or quiz that goes towards your grade. Students who miss class unexcused will receive a 0 on any class assignment or quiz and will have no opportunity to make it up. If students have to miss class for an unavoidable reason, they should reach out to me by email (khur@japan.lakeland.edu) no less than 24 hours before, after which they will receive no grade for any assignments they miss.

Students who have 5 or more unexcused absences will automatically fail the course. Students who have 7 or more absences, excused or unexcused, will automatically fail the course. By school policy, students are not allowed to miss more than 33% of classes.

Disability Accommodation

If you have a need for disability-related accommodations or services, please contact disabilityaccommodation@japan.lakeland.edu to request the application form. Lakeland University will provide reasonable and effective accommodations and services to students when such requests are made in a timely manner and are accompanied by appropriate documentation in accordance with federal, state, and University guidelines.

One type of accommodation may include extra absences above the limits your teacher may place on the class. This number of extra absences must be negotiated between the student and the instructor at the beginning of the semester, but the total number of allowed absences, both excused and unexcused, may not exceed 33 percent of class sessions. It is each student's responsibility to know how many absences they have and whether they will be excused or not.

Diversity and Respect

LUJ is a very diverse campus with students and faculty from all over the world. As the *Values* section of Lakeland University Academic Catalog states: "We are a community that welcomes all people regardless of their gender, race, religion, sexual orientation, socioeconomic status, disability, or country of origin. We value differing backgrounds, cultures and viewpoints and accept our responsibility to treat each other with fairness, compassion, and civility." While we place the highest value on freedom of expression and the exchange of a wide range of ideas, LUJ **will not tolerate personal attacks, shaming, intimidation, bullying, threats, or any kind of denigration of other students, faculty, or staff.** All instances of bullying or personal attacks should be reported to the Dean or Vice President immediately.

Learning Center

LUJ Learning Center provides in-person tutoring for most classes offered at LUJ.

To make an appointment for tutoring follow the instructions below. You may also "drop-in" and get tutoring if a tutor is available. The Learning Center is in Room 509 in the LUJ Library.

To make an appointment for tutoring:

1. Go to LUJ's Homepage at <https://luj.lakeland.edu/>
2. Under the Current Students and Faculty tab (far right) choose "Learning Center"
3. Scroll down and click on the Tutoring Schedule or the "Access Online Tutoring Schedule" button.
4. Select a tutor based on the day, time, and subjects available. The subject codes are explained along the top of the schedule.
5. Click on the link for your preferred tutor.
6. Choose the day and time of your appointment.
7. Enter your name and email address and click "schedule event"
8. Click "confirm"
9. A notice will be sent to your email. At your appointed time go to the Learning Center in Room 509 in the LUJ Library. Your tutor will be waiting for you.

Contact: learningcenter@japan.lakeland.edu

or Garrett Speller at: gspeller@japan.lakeland.edu

for assistance.

Plagiarism and Cheating

Lakeland University expects academic honesty from all its students. We assume all work turned in by a student is the student's own work. Cheating, plagiarism, or other kinds of academic dishonesty are violations of established university expectations and may result in penalties ranging from failure of an assignment to dismissal from the university, depending upon the severity of the offense.

Plagiarism includes but is not limited to a.) the intentional or unintentional use of another person's work without acknowledging that source through formal citation; b.) the use of materials prepared by another person or agency engaged in the selling of essays or other academic materials; and c.) the unauthorized assistance of Artificial Intelligence (A.I.) or Multilingual and Natural Language Processing (NPL) software.

What is plagiarism? The following excerpt from *The Craft of Research* describes some of the general conditions under which plagiarism can occur:

You plagiarize when, intentionally or not, you use someone else's words or ideas but fail to credit that person. You plagiarize even when you do credit the author but use his exact words without so indicating with quotation marks or block indentation. You also plagiarize when you use words so close to those in your source, that if you placed your work next to the source, you would see that you could not have written what you did without the source... (Booth et al., 1995, p. 167)

Be sure to keep track of the sources you consult in completing your assignments and formally reference any ideas or quotations from them using an approved citation style. Keep in mind as well that you plagiarize when you use materials prepared by another person or agency engaged in the selling of essays or other academic materials or inappropriately use Artificial Intelligence (A.I.) or Multilingual and Natural Language Processing (NLP) software.

No use of AI is tolerated in class, during quizzes, or during tests. You are not permitted to use AI for any assignments or projects outside of class.

It is the student's responsibility to understand and avoid plagiarism and cheating; students also are responsible for understanding their instructor's policy on self-plagiarism, the "recycling" of one's previous work.

Instructors have different stances on whether you can repurpose or "recycle" your previous writing and work for new assignments. In some cases, the practice may be encouraged as a way to develop your thinking and level of analysis on a subject. In other cases, the behavior may be viewed as a form of academic misconduct called "self-plagiarism." In this course, you may not repurpose your previous work in any form.

The work you produce for this course must be your own. Any evidence of plagiarism will result at least in the failure of the offending assignment. Other penalties include failure of the course and suspension from the university.

Students who believe they have been unfairly accused or penalized may submit a written appeal, stating the specific details of their situation to the Dean of Lakeland University – Japan (LUJ). Where appropriate, the Dean may take such appeals to an Academic Appeals Committee for a formal hearing and decision. In matters of plagiarism and cheating, the decision of the LUJ Dean and Academic Appeals Committee is final.

Grade Scale

A = 93% to 100%

AB = 88% < 93%

B = 83% < 88%

BC = 78% < 83%

C = 73% < 78%

CD = 68% < 73%

D = 60% < 68%

F = 0% < 60%

Grade Weighting

20% - Midterm

20% - Group Project

30% - Quizzes

30% - Final

Class Schedule

Date	Session	Quiz	Topic
Jan 5			Reading Day
Jan 7	1	No	Intro to Programming I
Jan 12			National Holiday
Jan 14	2	No	Think Python: Programming as a way of thinking, Variables and Statements
Jan 19	3	Yes	Think Python: Functions, Functions and Interfaces
Jan 21	4	Yes	Think Python: Functions and Interfaces
Jan 26	5	Yes	Think Python: Conditionals and Recursion
Jan 28	6	Yes	Think Python: Return Values
Feb 2	7	Yes	Think Python: Iteration and Search
Feb 4	8	Yes	Think Python: Strings and Regular Expressions
Feb 9	9	No	Midterm
Feb 11			National Holiday
Feb 16	10	Yes	Think Python: Lists
Feb 18	11	Yes	Think Python: Dictionaries
Feb 23			National Holiday
Feb 25	12	Yes	Think Python: Tuples
Mar 2	13	Yes	Think Python: Text Analysis and Generation
Mar 4	14	Yes	Think Python: Files and Databases
Mar 9	15	Yes	Think Python: Classes and Functions
Mar 11	16	Yes	Think Python: Classes and Methods
Mar 16	17	Yes	Think Python: Classes and Objects
Mar 18	18	Yes	Think Python: Inheritance & Group Project
Mar 23	19	Yes	Open Data Structures: Intro + Array-Based Lists & Group Project
Mar 25	20	No	Open Data Structures: Hash Tables & Group Project
Mar 30	21	No	Group Project
Apr 1	22	No	Final Exam (Tentative)
